

Sunfab Hydraulics AB is fully committed to adhering to international and national regulations regarding hazardous substances, including Persistent Organic Pollutants (POPs) and per- and polyfluoroalkyl substances (PFAS). This declaration outlines our compliance with relevant regulations in both the European Union and the United States.

We ensure compliance with the following regulations:

- EU POPs Regulation (EU) 2019/1021, which implements the requirements of the Stockholm Convention.
- EPA's Toxic Substances Control Act (TSCA) in the United States, which governs the use of PFAS substances.

Our products include sealing components made of PTFE (polytetrafluoroethylene), a type of PFAS currently not restricted due to its recognized stability and low environmental impact. The European Union has proposed broader restrictions on PFAS, a proposition that is now under assessment. Sunfab Hydraulics AB is closely following the development of potential new regulations together with our suppliers. We are committed to ensuring compliance and minimizing the environmental impact of our products.

For further questions or if you require additional documentation, please do not hesitate to contact our local sales agent.
